Summary

Third-year B.Tech Computer Science student with strong programming and problem-solving skills, focused on AIML and cybersecurity and real-world software development. Currently improving Deep learning, MERN Stack, DSA, Problem Solving Skills and seeking internship opportunities.

Education

B.Tech Computer Science (Cybersecurity) — SRM University AP	CGPA: 8.5
Intermediate — Sri Chaitanya College TGBIE , Hyderabad	Marks: 935
10th — Sri Chaitanya School TGBSE, Hyderabad	CGPA: 9.8

Projects

Dynamic Homoscedastic Multi-Task Loss Weighting [GitHub](#)

- Replaced manually fixed task weights with adaptive homoscedastic uncertainty parameters and validated the approach using a synthetic multi-task benchmark

RBW – Full-Stack E-Commerce Platform [Frontend](#) [Backend](#)

- Built a full-stack e-commerce platform with customer ordering, admin management, JWT-based authentication, role-based authorization, REST APIs, and MongoDB integration

MERN Stack News Application [GitHub](#)

- Built a responsive MERN application with dynamic news fetching and backend API integration

Inventory and Sales Management System [GitHub](#)

- Developed a CLI-based system for inventory management, sales tracking, revenue calculation, and stock monitoring

Authentication System (C++) [GitHub](#)

- Developed a role-based authentication system using C++, encryption, file handling, and input validation

Course Registration Management System [GitHub](#)

- Developed a SQL-based course registration system applying relational database design and normalization concepts

Esona AI [GitHub](#)

- Developed an AI-powered voice emotion detection system using speech analysis and emotion recognition

Jambavan [GitHub](#)

- Developed a platform focused on helping users rediscover and improve forgotten skills through engagement and skill development

Technical Skills

Languages: C, C++, Python, JavaScript, SQL

Web: HTML, CSS, React.js, Node.js, Express.js, MERN Stack, REST APIs, JWT Authentication

AI/ML: Machine Learning, Deep Learning, Neural Networks, CNNs, Classification, Regression, Multi-Task Learning, Attention, Zero-Shot Learning, Few-Shot Learning, PyTorch, NumPy, Pandas, Matplotlib, Scikit-learn

Core: Data Structures and Algorithms, DBMS, Problem Solving

Tools: Git, n8n, GitHub, VS Code, MongoDB Compass, SQL Workbench, Render, Vercel

Activities and Certifications

- completed research internship at VIGIL Lab, IIT Hyderabad on Dynamic Homoscedastic Multi-Task Loss Weighting for BECA
- MongoDB Associate Developer
- PGDCA — Post Graduate Diploma in Computer Applications, C Programming, Excel, Word, PowerPoint
- Former ACM Student Chapter Member
- MSC Hackathon, HackSRM participant
- Proficient in shortform Video Editing and UI/UX Designing
